

We create audiovisual content that works.

MASSVIDEO is an audiovisual agency that knows that video is the format that travels the best between platforms, and the one that is most remembered by the users.

CORPORATE VIDEO. Audiovisual materials that reflect the culture of the organization and illustrate the corporate vision.

VIDEO MARKETING. Video communicates the benefits of the products and services in an attractive way and reduces the *bounce rate* in digital strategies.

PROFESSIONAL PHOTOGRAPHY. Nothing like having your own image archive; including staff, product or event photographs.

EVENT COVERAGE. Why invest in corporate or brand events, and not record it on video? It's like it didn't happen.

STREAMING. Live broadcasts via social platforms are a very powerful tool to reach a larger audience.

VIDEO TRAINING. We have reduced training costs for many companies. Video is an affordable and effective way to conduct training.

“Mass Video is now a part of our team. Working with them we have created relevant content, we use video to train our teams and generate records of all our brand activities”

-Customer who has used our services for 5 years

Experience in different industries

- .Technology and Digital
